

# MANIFESTO

**ON THE  
PLANNING  
SYSTEM OF  
THE REPUBLIC  
OF SERBIA**

**FOR A GOOD  
PUBLIC  
ADMINISTRATION!**

Republic of Serbia

PUBLIC POLICY  
SECRETARIAT OF  
THE REPUBLIC OF SERBIA

# Dear citizens,

- because we want to **improve the quality of our lives**, and make them better, more certain and safer
- to be able to respond to social challenges,
- to achieve the desired changes,
- foster development and ensure progress

# Let's make the best solutions through public policies!

By defining public policies, **we set our change-driven course.**

We determine the public interest and agree on what we can actually do to have better services and an efficient system for all the citizens.

Let us spend less time on queueing for services, eat healthier food, acquire modern education, and produce higher quality products.

# Why the Law on the Planning System?

- to be able to **plan wisely**
- to make **sustainable** plans as we know how much money we have at our disposal
- to manage **economically and diligently**
- to implement **efficiently**

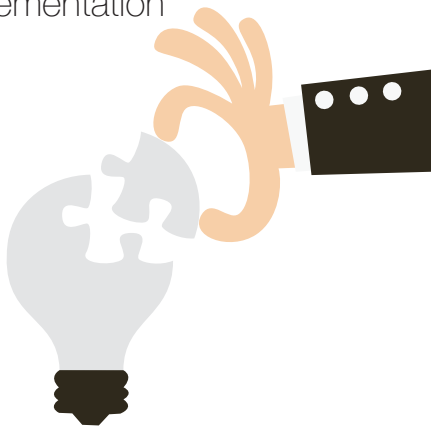

# Because our goals are:

- **efficient** citizen- and business-oriented **public administration**
- **quality** and easily accessible **public services**
- **accountability** of decision-makers
- data and evidence-based **decision-making**
- results-based **management**
- **agreement** on the best solutions, and
- **partnership** for change.

# Citizens have the right to:

- **be informed of** the commencement of public policy making
- **know** what effects the public policy will have on their lives
- **express** their views
- **impact** on the policy content through the process of consultations and public debates
- **demand** the necessary changes through initiatives
- **control** the implementation

It is vital that we jointly and in a responsible manner build an **organized, accountable, and modern** system of public administration.

# Therefore a solid planning system is:

**The base** for a socio-economic development, **approach** to the way of thinking, planning and results-based management, **the guardian** of the budget and trust, **support** for a secure and an efficient system of public administration, and **a point of agreement** on what we want and how we want to achieve it.
